

## Lascaux Brushes and Accessories

These brushes feature an Interlon synthetic dark-brown hair or bristle combination, set in a seamless nickel ferrule, fitted with matt black lacquered handles. The specially developed synthetic fibres achieve virtually the same performance as natural hair or bristle.

### Lascaux Artists' brushes

Lascaux Artists' brushes are hard-wearing, tough and springy, with excellent shape permanence and a responsive paint loading and delivery capacity. They are equally suitable for acrylic, gouache and oil painting.

### Lascaux Watercolour brushes

Lascaux Water colour brushes are a high quality alternative to conventional red sables. Like Lascaux Artists' brushes, the heads are a fibre combination set in seamless nickel ferrules. Lascaux Watercolour brushes are fitted with short, bare-wood handles and offer the same quality features as Lascaux Artists' brushes.

# Lascaux Brush Cleaner

## Composition

Lascaux Brush Cleaner is a water based product which achieves its effect through surface active substances.

## Properties

- Contains no solvents, phosphates, acids or caustic alkalis
- is biologically degradable
- is not flammable, does not strain and does not attack brush bristlers or hairs, fabric, wood or other art materials

## Applications

- removes acrylic and gouache (to a certain extent also oil paint) gently and reliably
- cleans brushes and other painting and spraying tools
- removes old paint from fabric, ceramics, plastic, concrete and other materials
- suitable for degreasing metal, glass and plastic

## Directions

Lascaux Brush Cleaner is extremely economical: it is usually diluted with water in a 1:1 mix or used in a weak solution of as little as 3% (30 ml of Lascaux Brush Cleaning Fluid to 1 litre of water). Undiluted application is only necessary for encrusted deposits of old paint.

Mix Lascaux Brush Cleaner with water in a container. Dip the head of the brush in the solution, preferably suspended in a brush holder to keep the bristles off the bottom. Other painting tools can be simply placed in cleaning mix or wrapped in a soaked cloth. Cleaning takes a few minutes to two days, depending on the size and age of the deposit. Increasing the temperature of the Brush Cleaner up to 40° C (104° F) will also increase its efficiency. This is recommended for the removal of oil paints. After treatment, rinse the cleaned objects thoroughly in warm water (soapy water for brushes if necessary).

The product does not dissolve the paint, it swells it up. The paint residues collect at the bottom of the container. As a result, the cleaning fluid stays clean and can be simply poured into another container for re-use later. The resulting small quantities of paint particles can be discarded in house-hold waste according to local regulations.

The discoloration of the brush cleaner caused through long exposure to light will not affect it's effectiveness.

## Sizes

Lascaux Brush Cleaner is available in 250 ml and 1 l plastic bottles.

## Notes

Keep out of reach of children. In case of contact with skin or eyes, rinse immediately with plenty of water. If swallowed drink plenty of water and seek medical advice immediately.

Danger: H318 Causes serious eye damage.

USA: conforms to ASTM D-4236.

# Lascaux Sirius® Palette

- A versatile, round, practical colour palette for artists, schools and art therapy!
- Ideal for colour mixing
- Made of unbreakable polypropylene, hence extremely robust
- Minimum discoloration. Any staining which does occur can be largely removed with a water-based cleaner (e.g. Lascaux Brush cleaner), alcohol or acetone
- Eco-friendly disposable

## Dimensions

diameter 170 mm, height 25 mm, 2 mm thick

# Fineline Applicator for Lascaux bottles

## Fineline Applicator

Fineliner for signatures, ornaments, drawings etc. Steel needle, line width 0,8 mm, length of needle 25 mm. Screw attachment for Lascaux bottles of 85 ml and 250 ml.

## Fineline Applicators XL (large)

Fineliner for signatures, ornaments, drawings etc. Steel needle, line widths 1,3 mm (yellow), 1,4 mm (white), 1,7 mm (blue), length of needle 25 mm. Screw attachment for Lascaux bottles of 85 ml and 250 ml.
